Thanks Nancy. I spoke with Commissioner Lachelt who will be calling Shaun shortly. Here is the plan based on your comments below.

- 1.EPA will sample the additional constituents tomorrow before any further application to the mine opening
- 2.EPA will provide the samples to its lab and provide results directly to the County
- 3.This week the County will separately pursue consent for access from the mine owner, likely through Peter Foster. If we are granted access, we will pull our own samples. but EPA should not delay stabilization waiting for this to occur.

Please let me know if you have any questions. I would appreciate a confirmation either way.
Sheryl

> Nancy: Commissioner Lachelt has sporadic cell coverage but she sent me a text stating that she had a commitment from Shaun this morning that the EPA would do the additional sampling and that EPA would stop with the stabilization until it is done. Could the EPA not take the samples, process them with your lab and provide results to us? This would be consistent with all other forms of sampling taken at the mine.

>>
>> If the County wants to pursue doing sampling at the mine site -- even if EPA takes the samples and turns the over to the county, there would remain an access issue. The County would have to evaluate any associated risk if you were not able to ascertain access from Mr. Hennis. Also, while EPA has sufficient bottles, the County would need to have decided on a laboratory.
